

BRINGING FUN TO THE PLAYGROUND!

JennSwing® and the Cubby® are designed to help meet the Americans With Disabilities Act guidelines for playground equipment in public recreation applications, make the term *"handicapped accessible"* mean more than just being able to watch. The seats are also convenient in that the child can easily be lifted onto and quickly strapped in—an added advantage for parents and guardians! With its partially-reclined, body-embracing design and easily adjustable safety harness, the JennSwing® and the Cubby® offer children a safe and comfortable fun ride. Give children with special needs the opportunity to enjoy the simple pleasure of swinging!

We now offer two different sizes of patented swings to better meet the needs of different sized children. The larger JennSwing® will accommodate children up to 125 lbs. Its seat is 14" wide and 11" deep. The seat back is 24" high. The knee to foot length is 14" long. It is 45" long overall. The Cubby® is made for smaller children, accommodating children weighing up to 60 pounds. Its seat is 13" wide and 7" deep. The seat back is 14" high. It is 31" long overall.

JENNSWING® & CUBBY® ADVANTAGES

- Addresses Americans Disabilities Act requirements for accessibility and safety.
- Durable, rotational-molded plastic seat outlasts other swing seats for children with special needs.
- Semi-reclined design offers better upper/lower body support.
- Leg rest gives added support.
- Fully-adjustable safety harness securely locks child into seat.
- Arm rest provide lateral support.
- Easily attaches to any existing swingset with S-hooks.
