

# THE JENNSWING® & CUBBY® GIVES KIDS WITH SPECIAL NEEDS THE JOY OF PLAYING!

No child should be denied the fun of playing in the park or at home with friends - even if that child has physical disabilities or handicaps which might otherwise prevent this. Psychologists and educators along with parents, agree upon the importance of play in a child's development. Healthy attitudes about overcoming obstacles and building self-esteem are developed at an early age. Play is an important way of gaining a sense of belonging and feeling of accomplishment.

**Now**, we offer two heavy duty **SWING FRAMES** that can be used with the JennSwing® and Cubby®, as well as other uses. The 10 ft wide frame should be used outside and cemented in the ground, but the 6 ft wide frame can be cemented in the ground outdoors or with the use of optional feet placed on patios or indoors without marring floors. The ten foot wide frame can be configured with any combination of two swings...with a normal swing and a Cubby® or Jennswing®, two Jennswings®, or even used with two regular swing seats. It has many uses. The six foot frame accommodates one swing. The end frame fittings and top rails are powder coated in green or red. Both the single and double frame use 2" galvanized pipe for the top beam and legs.

**The outside dimensions for the double frame are:** The top of the frame width is 10' 3". The bottom of the frame is width is 12' 9 1/2", The overall depth of the frame is 7' 2". The standard height of the double frame is 8' tall. These dimensions are after legs are cemented two feet in the ground.

**The outside dimensions for the single frame are:** The top of the frame width is 6' 4" wide: The bottom of the frame width is 8' 2" The over all depth of the single frame is 6' 11" The standard height of the single frame is 6' 6" tall.

*Special feet are available for placing frames on patios or on floors. Give children with special needs...swinging!*

Frames are available at other heights. Please specify how tall you would like the set. Do not forget to add pipe length if you are setting the set into concrete for a sturdier swing set.

Frames come with 2 3/8" stamped steel swing hangers. The Jennswing® and Cubby® come ready to attach to the swing frames, with s-hooks and shackles and a wrench to open and close the shackles. For the correct length of chain for the Cubby® or Jennswing®, you will need to specify the height of the top beam if you are cementing the frame into the ground or ordering a custom height of frame.

*Swings can be shipped via UPS as oversized 70lb boxes. Frames must be shipped by truck. Swings and frames are shipped FOB Santee, California.*

# BRINGING FUN TO THE PLAYGROUND!

JennSwing® and the Cubby® are designed to help meet the American Disabilities Act guidelines for playground equipment in public recreation applications, make the term “*handicapped accessible*” mean more than just the being able to watch. The seats are also convenient in that the child can be easily lifted onto and quickly strapped in...an added advantage for parents and guardians! With its partially-reclined, body-embracing design and easily adjustable safety harness, the JennSwing® and Cubby® offer children a safe and comfortable fun ride. Give children with special needs the opportunity to enjoy the simple pleasure of swinging!

We now offer two different sizes of patented swings to better meet the needs of different sized children. The larger JennSwing® will accommodate children up to 125 lbs. Its seat is 14” wide and 11” deep. The seat back is 24” high. The knee to foot length is 14” long. It is 45” long overall. The Cubby is made for smaller children, accommodating children weighing up to 60 pounds. Its seat is 13” wide and 7” deep. The seat back is 14” high. It is 31” long overall.

Low-profile, body-contoured design for upper/lower body and leg rest support.

Rugged, lightweight, rotomolded plastic in 3/16” thickness for years of worry-free use.

Harness material made of woven, water-resistant polypropylene with plastic side-release buckles.

## JENNSWING® & CUBBY® ADVANTAGES

- Addresses American Disabilities Act requirements for accessibility and safety.
- Durable, rotational-molded plastic seat outlasts other swing seats for children with special needs.
- Semi-reclined design offers better upper/lower body support.
- Leg rest gives added support.
- Fully-adjustable safety harness securely locks child into seat.
- Arm rest provide lateral support.
- Easily attaches to any existing swingset with S-hooks.
